INTEGRATIONS

Admit/Discharge/Transfer (ADT)

Automate the addition, modification, and termination of account records in FullCount based on data obtained from your existing databases. Update your existing EHR or billing system, and subsequently, have the information automatically synchronized with FullCount.
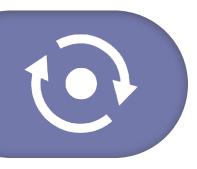

Ensures records are up-to-date and accurate across multiple systems, leading to improved resident experiences. Additionally, it can save labor and frustration for your billing and admissions team.

Netsmart myUnity™   **PointClickCare®**   **vitals**   **YARDI**

API Connect

FullCount data is pulled by your existing Resident Engagement Platform so your residents can conveniently view FullCount account balance and transaction information within one solution.

Convenient, consolidated view, reducing the need for residents to access multiple systems or tools, improving resident satisfaction.

caremerge   **K4 CONNECT** Life. Connected.   **touchtown**   **viibrant®**

Single Sign On (SSO)

Residents seamlessly navigate from an existing Resident Engagement Platform to the FullCount Resident Portal with the click of a button to view account information and interact with advanced features, such as Online Ordering and Reservations.

Streamlines and simplifies your resident interactions via a smooth and intuitive path to FullCount features without having to log in multiple times. Enhance the experience by providing easy access to the services they need.

caremerge   **cubigo**   **touchtown**
