

# Online Ordering

- Completely customizable to meet your operational needs.
- Flexible and convenient for staff and residents-order from anywhere, via the web-based portal application.
- Include images of plated items for easy identification.
- User-friendly design with familiar layout and functionality.
- Menus pull from same database as existing POS system, with options to customize availability.

“ FullCount’s online ordering helps streamline the ordering process and reduces the amount of time staff takes to input orders into the system.

I like how we can pick a time for orders to print out all at once for certain meal periods.

Staff and residents like how simple it is.

*Tae Fant | Senior Dining Services Director
